Product Information

Want to add forward led lighting to your Westin bull bar, winch or looking for a custom fit? Westin's powerful LED spotlights are the perfect solution. Westin's circuitry is designed in-house to be more powerful, more efficient and to generate less heat. Which means you can flood the trail with LED light extending your off-road fun. Our LED Light Bar housings feature heat sinks designed to keep inside temperatures at a minimum allowing our LEDs to run cooler and brighter. Which means you can rest easy knowing your LED spotlights won't quite on you. We then give our housings a high-quality powder-coat and finish them off with a custom-molded rubber seal and an unbreakable scratch resistant lens. Which means they can stand firm against environmental attacks. Mounting hardware included. * Reverse polarity protection * Shock proof, shatter and scratch resistant polycarbonate lens * Ip 68 rated - water proof up to 4 hours at 1-meter depth * 3 watt Osram led * 50,000+ operating hour
