Product Information

Adding underwater lighting to your vessel has never been easier. One small cable hole and a few mounting screws is all it takes. Race Sport Lighting's Surface Mount Underwater LED lights compete with other LED models costing over twice as much. They boast a corrosion-proof, solid stainless steel body with a polycarbonate lens that is resistant to marine growth and does not require bonding or painting. Overheating is not a problem, due to the active thermal management system which manages the unit's light output based on temperature. These lights can be installed below the waterline, and are ideal for transom, hull-side, and many other locations. Compact and with a very slim profile, they can be installed on any size vessel.

Our Oval 6x3G Marine Lights have the following features:

- Increased output over our 6x1W
- Available in 5 output colors (Red, Green, Blue, White, & RGB multicolor)
- Surface mount for fast, easy installation.
- Completely self-contained, fully sealed, fully waterproof, and fully submersible
- One piece stainless steel design
- IP67 compliant
- 12-24V DC
- 1 Year Warranty
