Product Information

Boasting as much as 50% more light than our previous LED switchbacks, Race Sport Lighting's High-Powered Switchbacks use a unique lens system to intensify and project light further for ultimate visibility. For this reason, our high-powered switchback LED bulbs are TWICE as bright as other switchback LED bulbs on the market! These high-powered 1157, 3157, or 7443 Switchback LED bulbs are direct replacements for dual function lights that have both the parking/city light and turn signal function in one bulb.

- White/Amber Switchback function
- LED Quantity: 28 LED Emitter SMD Chips on each LED bulb
- Operating Voltage: 1-16VDC
- Special IC built-in for delay between Amber and White
- Although typically not required, we recommend installing our 60HM25WATT load resistors with these bulbs to prevent hyper-flashing or error messages
- 1 Year Warranty
